

Dear Patrons,

We are pleased to announce the transition of our entire manufacturing operations to Tanjore.

We have added a new factory shed and open storage yard totalling an additional 50,000 square feet to existing capacity vastly **enhancing our production capacity & capabilities**.

Some noteworthy additions:

- 1) new test rig in addition to existing 3 test rigs making it total of **4 test rigs**
- 2) new paint booth in addition to existing 2 paint booths making it a total of **3 paint booths** & grit blasting machine
- 3) new cnc machine (making it a **total of 4 CNC machines** - highest number of CNC machines for a Pipe Supports manufacturer in Middle East, India & Asia)
- 4) two new radial drilling machines making it a total of 4 radial drilling machines
- 5) new mobile crane in addition to our existing overhead cranes & forklift trucks to improve overall handling, safety and speed
- 6) **new storage shed exclusively for wooden boxes** to ensure **state of the art packing** and other complementary facilities
- 7) addition of a new genset making it a total of 2 gensets even though we do not experience power failure; however ensuring 100% power back
- 8) addition of a new state of the art dedicated server room to ensure all your data is protected
- 9) addition of a new record room and expansion of **training room** to constantly **enhance & upgrade skills** of staff & workmen. It is important to note that we have focused on extensive webinars and training programs during the last few months of pandemic.
- 10) our factory presently operates in 2 shifts with *flexibility to operate a third shift*.
- 11) we have also strengthened our engineering and quality teams with the addition of experienced staff to our team

We continue to practise strict hygiene given the global pandemic. We did not have any guest workers at Tanjore and we have retained all our staff and workmen during and after the lockdown.

We appreciate your patronage and continued support and are raring you go with renewed vigour with the additional capacity & infrastructure as mentioned above.

Our Corporate office has moved to our factory premises in Chennai. We have modernized our office facilities with state of the art technology for our estimation and engineering teams.
