

News Letter-18

Dear Patrons,

We have pleasure in releasing our new catalogue "Pipe Hangers and Supports 2019". Kindly download the latest catalogue from below link.

https://www.pipehangers.in/pdf/Catalogue_phspl_new_2020.pdf

One of the major additions is the inclusion of components for higher loads, with thread size up to M120. We have been supplying these components to our customers successfully for many years and we thought it fit to include these components in the catalogue.

We have also made modifications to the design of Pipe bases for the lower sizes. We did this, to address certain issues that we had encountered during the manufacturing of these clamps, over several different projects in the past two decades. Similarly, we have made changes to the rigid strut dimensions to iron out certain minor constraints from the point of view of manufacturing feasibility.

We have also rationalised the list of components included in our catalogue, to remove certain components that are sparingly used, in order to make the catalogue more concise.

Also included, are photographs of products manufactured by us in the past years.

We trust that the new catalogue would add value to our esteemed customers and solicit their feedback.

We remain, as always, your trusted supplier of choice!

Thanks and Regards

Ravi Shanker Singh
Sales Manager
